

COVID-19 UPDATE

February 9, 2023

Dear Residents,

While the risk levels in our region are declining for flu as well as COVID-19, those illnesses are still present, and we recommend that you **continue to wear a face mask when you're in a group, practice good hand sanitation, and stay home when you feel ill.** These simple precautions can help keep you healthy!

UPDATE ON COVID-19 IN OUR COMMUNITY:

This update encompasses the period from January 25 through February 7. **During those weeks, we have not learned of any COVID-19 cases among residents, employees, or independent contractors.**

Take care and stay well.

Sincerely,

James C. Edwartoski
AVP & Executive Director
